OSI Is Entered for the Schools Cost Center, but No WOR is Being Created

PROBLEM

The OSI is entered for a Schools cost center, which should then post to the WOR. The WOR is not being created and is not available to print for the unit.

SOLUTION

1. Go to **Maintenance → Schools** and set up a school for the cost center that is not getting the WOR.
2. **Delete** the OSI that has already been entered.
3. **Reenter** the OSI and save it.
4. You should now be able to print a WOR for the cost center.
