

Reboot Your Computer on a Regular Basis

Does Web UFS seem to be running slow or not behaving as expected?

All Sodexo employees are strongly encouraged to reboot their computers on a regular basis. Rebooting your computer has multiple benefits:

- Allows essential security updates to be properly applied, which protects your PC and greatly contributes to a more secure computing environment at Sodexo
- Ensures that any recent changes to your computer are properly applied
- Enables recently installed applications to run properly
- Provides a cleaner Windows environment by 'starting fresh', which results in a faster computer!

Laptop users: Be sure to Shut Down your computer at the end of your work day. Simply closing the lid or entering sleep mode will not provide the same benefits as shutting down and restarting!

Desktop users: Restart your computer as you are leaving the office for the day.
