

Unit Financial System SAP AP Posting Logic

SAP Posting Logic for Accounts Payable Invoices

Accounts Payable invoices will post to SAP using the Saturday – Friday financial cut off week via the following methods:

- **Manual Invoices:** The *UFS transmission date* determines the SAP posting date. Any manual invoice that is transmitted **after 7:30 pm ET on Friday** will post in SAP to the future w/e date.
- **Electronic Invoices:** The *invoice approval* date determines the SAP posting date. Any electronic invoice that is approved Saturday - Friday will post to that Friday w/e date. After Friday, they post to the next week ending date.

Month-end exceptions are in place to align Accounts Payable invoices to the proper financial month via the following methods (*note: cutoff time during close week, BD+2, BD+3 and BD+4 is 4:30 pm ET*):

- **Manual Invoices:** On the 1st calendar day of the new month through noon (ET) on BD+2 (2nd business day), the *UFS system week ending date* determines the SAP posting date.
- **Electronic Invoices:** On the 1st calendar day of the new period through noon (ET) on BD+2 (2nd business day), **SAP reviews the invoice date to determine the posting date.**
 - An invoice approved with an invoice date in the month being closed will post to that month-end date in SAP.
 - An invoice approved with an invoice date in the new month will post to the **approval date**.
