

# School Services Unit Meal Entry Shows Last Month's Data

## PROBLEM

---

When a Unit does a New Week Setup (NWS) from the end of one month into Week One of the next in Web UFS, the data from last month still appears on the *Meal Entry > Meal Entry > Meal Entry* browse screen.

## SOLUTION

---

A unit may enter the data as usual for the current month. Prior month's data will be archived overnight. On the next day, the prior month's Meal Counts will not appear on the browse screen.
